Historical Events During 125 Years Since Bank Began

The Bank of Montreal Has
Served Dominion Under
Eight British Sovereigns

Founded After Waterloo

World Highlights During
Canadian Institution's Long
Career Which Started Two
Years After Napoleon's
Defeat

Perhaps the best way to put in its rightful perspective the era in which the Bank of Montreal was established is to say that its founding was undertaken two years after Wellington's victory at Waterloo brought to an end the great Napoleonic Wars and freed Europe from a tyranny which left it impoverished and from the shock of which it took many years to recover. The Bank has served Canada under eight British sovereigns, has lived during the terms of office of twenty-eight of the thirty-two presidents of the United States. Here is a chronology of some of the history-making events in Canada or affecting Canada in the Bank's lifetime.

1817—Signing of the Rush-Bagot Agreement, in which was rooted the disarmament between Canada and the United States which has existed for 125 years. Founding of the Bank of Montreal, the first permanent bank in Canada, giving to Canada its first organized financial system and its first domestic bank currency.

1818—Opening of branches in Quebec, Kingston and York (laterwards Toronto). The Bank's first manager at Quebec was Daniel Sutherland, the Deputy Postmaster-General for British North America.

1819—Birth of Queen Victoria.

1820—Death of George III.

1821—Coronation of George IV. Excavation begins on the Lachine Canal, to which enterprise the Bank gives important financial assistance. The canal was completed in 1825.

1825—World's first railway—the Stockton and Darlington—commences operation.

1825-1827—Great depression as an aftermath of the Napoleonic Wars.

1829—Welland Canal opens for traffic.

1830—Death of George IV. Accession of William IV.

1831—Work commences on Champlain Canal, finally completed 1839.

1832—City of Montreal is incorporated. Asiatic cholera in Quebec.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

1833—The first vessel to cross the Atlantic under steam alone, the S.S. Royal William, built at Quebec, sails from Pictou, N.S., and arrives in Gravesend, England, August 10th.

A FIGHTING BIRTHDAY

125TH ANNIVERSARY OF CANADA'S PIONEER BANK

Through all the ups and downs of a century and a quarter, Canadians have put their trust in the Bank of Montreal. The Bank has endeavoured always to justify this public confidence by its unwavering policy and practice of safe, constructive, convenient banking, even in the most trying times. Each obstacle surmounted has added to the strength and capacity for service that have characterized Canada's oldest bank from its start on 3rd November, 1817. Today, as the Bank reaches its 125th milestone in the midst of war, its directors, its management and the 6,000 men and women who comprise its staff are determined to continue to serve Canada and Canadians to the full measure of their ability and the institution's strength.

From humble beginnings in the modest little rented quarters in St. Paul Street in Montreal, with a staff of but seven persons, the Bank moved forward step by step, expanding to meet the growing needs of a pioneer country. The Bank gave Canada its first real money by the issue of its own bills and copper coins, and as its organization spread out—branch by branch—it brought to the early colonists some semblance of business organization where before only barter methods had existed.

From its inception the Bank had a wide vision of its usefulness and began at once to lay the foundations of a banking system for the whole country.

First came its agency in old Quebec City, two weeks after its establishment in Montreal. Six months later, its branch in the garrison town of Kingston... then on to York, a lumber settlement of a thousand people in the midst of virgin forest—now the Queen City, Toronto.

Then sprang up branches at Bytown—now Ottawa, the capital of the Dominion—at Hamilton, London, Brockville, Amherstburg, St. Thomas, Belleville, St. Catharines, Cobourg, Saint John and Halifax... and then out into the West—to Winnipeg in 1877, bringing the first permanent banking facilities west of the

Great Lakes—then on to Regina, to Calgary, and finally to Vancouver—a nation-wide chain completed immediately following the arrival of the railway in 1886.

Pathfinders and pioneers, Bank of Montreal men struck out to the East and to the West over an uncharted course—at one time travelling by stagecoach over rough forest roads, at another by arduous trek through the wilderness on snowshoes.

Courage and resolution of purpose—in fur trader and lumberman, in farmer and railway builder, in merchant and businessman—these are the enduring characteristics which through the years have made Canada great... and among this great company of nation builders is numbered the banker, a partner with every one of them.

The 125 years since 1817 have been full ones... years of hardship and pioneering effort were followed by years of expansion and prosperity. There have been years of war, of panic and depression and of political upheaval, and there have been years of peace and plenty... dramatic years, dynamic and historic years. (Starting only two years after Waterloo, the Bank has passed through the troubled times of the Crimean War, the Indian Mutiny, the American Civil War, the Fenian Invasion of Canada, the Afghan War, the Sudan War, the South African War, the First World War—and now is engaged in World War II.)

Thus Canada's destiny has been the Bank's destiny—country and bank have suffered and prospered together.

Today, as Canada grimly navigates the most crucial period of her career, the Bank of Montreal, rendering a thoroughly modern and efficient banking service in all departments, is marching shoulder to shoulder with Canadians—glad to be able to aid the government in carrying out its financial policies—glad to be able to extend credit to businessmen who are turning out the materials of war—glad to be able to lend money to the farmer who toils to increase food production for the United Nations—glad to be able to work with Canadians in the war forces and in every walk of life.

Just as the colonists looked to the Bank for leadership as it pioneered the way in 1817, so in the modern, streamlined times of 1942, Canadians naturally expect the Bank of Montreal to play a leading part in pathfinding through the critical days ahead.

The Bank's directors, management, and the six thousand men and women who comprise its staff are pledged to this task, and daily work in the confidence that Canada will win through to a future that will far outshine its record of the past.

VICTORY

Erected to the memory of the 231 members of the Bank of Montreal's staff who gave their lives in the Great War, 1914-18, this monument of Victory, standing in the entrance hall of the Bank's Head Office, takes on an added significance as World War II enters its fourth year. Today more than 1000 members of the Bank's staff are serving in the Forces.

Our Historical Firsts

- First permanent bank in British North America
- First to establish Branch Banking in Canada
- First bank in the capital of Lower Canada
- First bank in the capital of Upper Canada
- First permanent bank west of the Great Lakes
- First institution to provide Canada with a domestic currency (both bills and coinage)
- First bank to assist in financing Foreign Trade of Canada
- First banker for the Government of Canada

BANK OF MONTREAL

"A BANK WHERE SMALL ACCOUNTS ARE WELCOME"

MORE GOOD NEWS FROM THE PRODUCTION FRONT

Announcing THE FIRST BILLION OF WAR PRODUCTS IN '42

THANKS TO 341,000 GENERAL MOTORS MEN AND WOMEN
IN THE UNITED STATES AND CANADA
THANKS TO OUR THOUSANDS OF SUPPLIERS AND SUBCONTRACTORS

Who Are Doing the Job

Already this year General Motors has delivered guns, tanks, airplanes, airplane engines, Diesel engines, trucks, shells, and hundreds of other items for our armed forces to a total value of more than a billion dollars.*

It is in no spirit of boastfulness that we make this encouraging report, but with full realization that the job ahead will call for even greater effort on the part of all of us.

This ever-increasing contribution to the war effort is being made in the truly democratic way: through the application of management experience, engineering knowledge and mass-production "know-how." As a result, voluntary reductions have already been made in contract prices, saving Governments hundreds of millions of dollars.

*We would like to tell you just how many of these items have already been produced, but such information would be of value to the enemy.

GM BUILDS

Allison Aircraft Engines
Army Trucks
Airplanes
Pratt & Whitney Engines
Machine Tools
Bearings
Generators and Regulators
Diesel Engines for Tanks,
Trucks and Ships
Tank Gun Mounts
Anti-Aircraft Gun Mounts

Batteries
Shells and Shot
Tank Cannon
Ambulances
Blackout Lamps
Fuses for Shells and Bombs
Marine Electrical Equipment
Oil Coolers and Radiators
Carbines
Aviation Spark Plugs
Machine Guns
Radio Receivers
Airplane Landing Gears
Armored Cars
Naval Gun Housings
Parachute Flares
Gun Motor Carriages

EMPLOYMENT AT ALL-TIME PEAK

More men and women are working for General Motors in the United States and Canada than ever before—341,469 in all—and our payrolls are increasing at the rate of over 4,000 employees a week. At the same time, average hours per week are substantially increased over what they were a year ago.

SUPPLIERS AND SUBCONTRACTORS DOING HALF THE JOB

Since half the job is being done outside our plants by our suppliers and subcontractors, they are employing an additional 300,000 or more as their part of this war effort. Their effort and employment must continue to increase with ours.

VALUABLE TIME AND MATERIALS SAVED

Hundreds of improvements effected by General Motors pro-

duction men and engineers are saving millions of productive hours and thousands of tons of critical materials. Through the General Motors Suggestion Plan the factory workers are also doing their part and have made more than 4,000 constructive suggestions, for which they have received awards in War Savings Bonds.

ALL PLANTS AT WORK ON WAR PRODUCTION

The 109 General Motors plants and operating units in 50 cities in the United States and Canada, are all on war production. Every General Motors employee in our laboratories, factories and offices is working for victory. From this production army comes an ever-growing volume of weapons, munitions and equipment for our Army, our Navy, our Air Force and our valiant Allies.

WORLD NEWS

Japan's Weapons Are Imitations of European Types

MELBOURNE, Nov. 3.—(CP)—Australian military experts who have examined and tested large quantities of Japanese equipment captured in the Miles Bay victory of September as well as in the other New Guinea actions have found a curious mixture of innovation and imitation.

One novelty in the mix of equipment is a grenade thrower which the Japanese call a "knee mortar," but the Australians doubt that the weapon could be fired from the knee as a mortar, the idea being that a man's knee could not withstand the recoil from a mortar shell.

It can, however, be held against the knee, with its mounded base plate, and used to throw specially fitted grenades.

PLAIN IMITATIONS

Probably the most marked characteristic of the weapons, however, is the imitation of European models. Authorities do not minimize the effectiveness of the Japanese arms. Nevertheless, the heavy machine-gun in this price list is an obvious copy of the French Hotchkiss and is an inferior weapon.

One Japanese sub-machine gun is actually a light machine-gun but at the same time it can be used as a portable weapon with a bayonet attached.

Captured Japanese army boots were found to be of good quality, but the cotton underwear was poor.

BULLET-PROOF VEST

A sentry's rubber coat was found to be extremely serviceable and there was even a bullet-proof vest which evidently had saved the life of some wearer, for a heavy bullet had struck right over the heart area. It merely dented the steel plate as it was deflected.

These jackets are rare and obviously are not of any issue. Other items captured included mosquito cream, sachets and pouches made of fine leather and "belts of a thousand stitches"—abdominal bands which combine attributes of health preservation in the tropics, and are supposed to bring good luck.

Official List War Casualties

R.C.A.F.

OTTAWA, Nov. 3.—(CP)—One man was reported killed on active service overseas and three were reported missing after air operations overseas by the R.C.A.F. in its 411th casualty list of the war issued last night.

The list contained only names of men serving overseas.

It also included two previously reported missing now reported prisoners of war and seven previously missing now presumed dead.

Following is the latest list of casualties, with official number and next-of-kin:

OVERSEAS

KILLED ON ACTIVE SERVICE:
Edwards, Lloyd George, PO, Boston, Mass. (father) (wife) Scotland, Scotland, Eng.

MISSING AFTER AIR OPERATIONS:
Norman, William Douglas, Flt. Sgt., Regina, W. A. (brother) (father) Ottawa, Ont.

MISSING: Robert Orville, Flt. Sgt., 41st, W. A. (brother) (wife) Ontario, Ont.

PREVIOUSLY REPORTED MISSING—NOW REPORTED PRISONER OF WAR:
Tait, John, Baptiste Roger Joseph, 100th, PO, 100th, W. A. (brother) (wife) 1400 Main St., St. Boniface, Man.

PREVIOUSLY REPORTED MISSING—NOW FOR OFFICIAL PURPOSES PRESUMED DEAD:
Baker, John Frederick, PO, 100th, W. A. (brother) (wife) 1400 Main St., St. Boniface, Man.

British Children Returning to U.K. Arrive at Lisbon

LONDON, Nov. 3.—(CP)—Reuters News Agency said yesterday in a dispatch from Lisbon that a party of British children returning home from Canada where they were evacuated earlier in the war has arrived in Lisbon aboard the Portuguese steamship Serpa Pinto.

Dutch Conscripted For German Forces

LONDON, Nov. 3.—(CP)—The German military authorities in Holland have begun conscription of Netherlands between the ages of 20 and 45 for service in the Nazi army. It was reported yesterday.

A Stockholm dispatch to Moscow said Aneta, the Netherlands news agency, said men failing to report when called up would be tried by a military tribunal.

Introduction of conscription in Holland was forewarned last month by Oberlin's paper, the Essener National-Zeitung, which said the Germans intended to draft "all men capable of bearing weapons" so that "German soldiers no longer will be amazed at the terrifying number of days in men who now spend their days in

cafes, waiting for the miracle that will bring back the old times."

"At this moment," the German paper said, "only 10,000 of the 3,000,000 Dutchmen are participating in the European war of liberation."

GETTING 'EM YOUNGER
LONDON.—(CP)—Minimum age for enlistment in the Air Training Corps has been lowered from 15 years to 13 years and three months.

flow overseas in the First Great War and in 1930 accepted a civilian post with the Canadian Air Board, which in 1934 was absorbed into the R.C.A.F.

He went overseas in 1940 and returned to take an important post with western air command headquarters in August last.

Western Officer Is Promoted to Rank Of Air Commodore

VICTORIA, Nov. 3.—(CP)—Promotion of Group Capt. Earl McLeod to the rank of Air Commodore was announced yesterday by western air command.

He becomes the third officer of air rank in this district. A former Chilliwack, B.C., schoolmaster, Air Commodore McLeod

flow overseas in the First Great War and in 1930 accepted a civilian post with the Canadian Air Board, which in 1934 was absorbed into the R.C.A.F.

He went overseas in 1940 and returned to take an important post with western air command headquarters in August last.

London Premiere Lend-Lease Film

LONDON, Nov. 3.—(CP)—A film entitled "We Sail at Midnight" picturing lend-lease operations, will have its premiere here Friday night. The film is the first ever jointly sponsored by the British and United States governments. Its "stars" include Administrator Edward R. Stettinius and other lend-lease officials.

"WE QUIT?" NOT WHILE OUR BOYS ARE FIGHTING"

"I'm making \$35 dollars a week and I feed a hungry family. (Excuse me—I was making \$35 before the last batch of taxes hit me. I still have all the family.)"

"So why am I buying Victory Bonds today? Well you see, a couple of boys I knew stayed on the beach at Dieppe. It's not a nice thought to go to bed with."

"Our boys are going in there again. And when they smack straight into those Huns—they're going to have the best equipment my money can help to buy. That's the least I can do—and the best way to do it is through my country's Victory Bonds."

"I'm not asking for any medals for buying these bonds. After all, I'll be laying up for myself the best of all investments—VICTORY BONDS are backed by all the resources of the Dominion of Canada; they yield a fair rate of interest; I can borrow against them; and they are readily saleable when I need the cash."

"So that's the way I feel about it. I'm going to keep right on paying my way in this man's war—and I'm not going to quit while our lads are in there pitching."

HOW TO BUY.—Give your order to the Victory Loan salesman who calls on you. Or place it in the hands of any branch of any bank, or give it to any trust company. Or send it to your local Victory Loan Headquarters! Or you can authorize your employer to start a regular payroll-savings plan for you. Bonds may be bought in denominations of \$50, \$100, \$500, \$1000 and larger. Salesman, bank, trust company or your local Victory Loan Headquarters will be glad to give you every assistance in making out your order form.
